It remains the Infanterie Kaserne and the Pionier Kaserne. In view of the T/O strongths of the brigades concerned, the strength estimates of paragraphs 1 through 5 of the present 50X1-HUM report are substantially too low, whereas the estimate of 7,000 troops in paragraph 10 is too high. However, in the three Waldkasernen, Rathenow, during the last menths, weapons observed have included: about 50 x 122-m and about 50 x 152-ma guns, most of them apparently howitzers; models 39 and 12x76.2-mm field guns; 1h x 57-mm AT guns; and 160-mm mortars. In view of these observations and the total strength estimate given in paragraph 10 of the present report, it appears possible that one additional howitzer artillery brigade may be stationed in athenow besides the two aforementioned brigades of the 6th Arty Div.
